SUMMARY

This is a report of forest production in Nova Scotia for the calendar year 1987, based on data collected by the Operations Branch of the Department of Lands and Forests. Compiling, editing, publishing and distribution were done by the Forestry Branch, Forest Resources Planning and Mensuration Division.

The information was collected from producers, processors and buyers of primary forest products. Sawmill firms reported the quantities sawn during the calendar year 1987, whether the wood was purchased, custom-sawn or produced by the mill owners themselves. Roundwood production was obtained from buyers and producers of pulpwood, pit-props, veneer logs and poles and piling. Pit props are included with poles and pilings for aggregation reasons. Sawmill residue chips are excluded for statistical reasons.

Production data are concerned only with wood of Nova Scotia origin. Export wood is included.

Production is shown as accurately as possible by county of origin. Resawn volumes are omitted to eliminate duplication of data.

The total commercial production, at roundwood level, amounted to 154,755,786 cu.ft. (4 369 534 m³), solid wood equivalent, up 19% from 1986. Sawlog volume increased by < 1% from 1986, amounting to 37,572,086 cu.ft. (1 063 922 m³) equivalent. Round products increased 25% to 3 305 612 m³ equivalent (export pulpwood included).

Compared to 1986, increases were reported for softwood lumber, hardwood laths, hardwood shingles, hardwood staves and headings, hardwood pulpwood and softwood pulpwood. Sawmill chips increased but figures are not quoted. All other products had decreased in production from 1986.

The pulp and paper segment of the industry is composed of five mills: a kraft pulpmill at Abercrombie Point; a sulphite pulpmill and newsprint mill at Point Tupper; a newsprint mill at Brooklyn; a paperboard mill at Hantsport and a hardboard plant at East River.

From 1986 to 1987 the total number of firms operating all types of sawmills decreased to 363.

The number of firms producing over one million board feet during 1987 was 45, the same as 1986. There were 277 firms producing less than one million board feet per firm, compared to 305 in 1986.

Of the smaller producers, 205 produced 100 Mfbm or less in 1987.

Firms producing over one million board feet per firm accounted for 14% of the number of firms and produced 87% of the lumber and boxwood.

As in previous years, fuelwood - whether in sawmill chip form or stacked - is not reported. Since 1983 whole tree chips have been reported, however, they are for all species and all diameters and are not included in any summary figures.

SUMMARY OF PRODUCER BY TYPE OF SAWN PRODUCTNOVA SCOTIA - 1987

	<u>1986</u>	<u>1987</u>
Firms producing lumber only	297	281
Firms producing boxwood only	3	5
Firms producing ties only	0	0
Firms producing mine packs only	1	4
Firms producing laths only	29	23
Firms producing shingles only	11	8
Firms producing staves & headings only	3	3
Sub Total	344	324
Firms producing more than one product	53	39
Total No. of Firms	<u>397</u>	<u>363</u>

See "List of Sawmill Owners and Materials Produced - 1987" for further information.

Production statistics by ownership class are included in this publication. Provincial Crown production was obtained from records kept by Department of Lands and Forests. Large Private owners provided data for private ownerships of over 1,000 acres (400 ha) per owner. Small Private ownership production was estimated by subtraction of Crown and Large Private production from the total provided by sawmill and roundwood producers.
